SUMMARY

Highly motivated Engineering Management graduate with experience in product analytics, business intelligence, and data-driven operations. Skilled in SQL, Excel, Power BI, KPI definition, dashboard automation, market research, user insights, and data storytelling to help organizations improve processes, track performance, identify growth opportunities, and make informed product and business decisions with measurable business impact

EDUCATION

University of Massachusetts Amherst

Massachusetts, USA

Masters in Engineering Management, GPA: 3.72/4.0

Sept 2024 - May 2026

Coursework: Product Management, Predictive Analytics, Statistical Learning, Database Management/Analytics, Descriptive Analytics, Marketing Strategy, Technical Project Management

Savitribai Phule Pune University

Pune, India

Bachelor Of Computer Engineering *with distinction*, GPA: 3.56/4.0

Aug 2020 - June 2024

Coursework: Database Management Systems, Data Science, Big Data Analytics, Business Intelligence, Machine Learning, Deep Learning, Artificial Intelligence, Software Modeling, Architecture

EXPERIENCE

University Of Massachusetts Amherst | *Student Assistant- Operations* February 2025 - December 2025

- Coordinated daily operations and KPI reporting for high-volume service workflows supporting 1,000+ students, resolving workflow visibility gaps and improving operational execution clarity across multiple business priorities
- Supported scheduling, inventory coordination, and issue resolution during peak service periods, improving workflow consistency, team coordination, and service delivery across daily operations in fast-paced environments

Essen Technocraft Pune | *Business Data Analyst Intern*

May 2025 - August 2025

- Analyzed operational data using SQL, Python, and Excel to resolve metric inconsistencies, identify reporting gaps, prioritize automation opportunities, and contribute to 10% scrap reduction, 15% improvement in preventive maintenance planning, and 12% increase in manufacturing efficiency through data-driven process optimization
- Built Power BI reports with KPIs, drill-down details, and operational insights to improve reporting accuracy, stakeholder visibility, decision-making speed, and production workflow efficiency across operations teams

Elite Software Pune | *Web Development Intern*

January 2023 - March 2023

- Developed responsive, client-requested web applications using HTML/CSS, JavaScript, React.js, Bootstrap, and databases to address usability gaps, improve page functionality, and support smoother user experiences
- Implemented scalable front-end components and database integrations to fix layout, performance, and workflow issues, improving application maintainability, clean architecture, and overall user experience and accessibility

PROJECTS

MythBuster.AI - Deepfake Detection

May 2025

- Partnered on a deepfake detection product concept addressing misinformation and digital trust challenges; defined 3 user personas, analyzed 25+ market research sources, identified user needs, and translated insights into product positioning, feature prioritization, roadmap planning, and go-to-market launch decisions
- Supported product analytics and go-to-market strategy by prioritizing 6 features, defining KPIs for user acquisition, engagement, retention, and verification accuracy, and projecting 10–15% conversion from 1,000+ users

Meduverse - AR Educational Platform

December 2024

- Collaborated on an AR medical education platform designed to improve access to interactive healthcare training; conducted 15+ customer discovery interviews with students and educators, identified learning accessibility gaps, and translated user pain points into roadmap priorities and scalable product feature recommendations
- Contributed to product strategy, market-entry planning, revenue model inputs, and adoption strategy for 50+ healthcare institutions, positioning the platform for scalable adoption and improving learner engagement by 30%

TECHNICAL SKILLS

Product Management: Product Strategy, Roadmap Planning, Feature Prioritization, Market Research, Customer Discovery, User Insights, Go-to-Market Strategy, Adoption Strategy

Analytics & Reporting: SQL, Excel, Power BI, Tableau, KPI Reporting, Product Analytics, Predictive Analytics, Ad Hoc Analysis, Data Storytelling

Business Intelligence & Collaboration: Dashboard Development, Data Visualization, Business Intelligence, Stakeholder Communication, Requirements Gathering, Cross-functional Collaboration, Process Improvement
